Host: An Unclassified Presentation for Faculty & Students

“Combat Stress versus Combat Resilience: The Role of Leaders in Forging Warrior Strength”

by

***Colonel Carroll Greene, USAF
Chief, Operational Psychology
U.S. Air Force Special Operations
Command***

**Tuesday, 18 April 2006
1500-1650**

Glasgow Hall, Room 102

Dr. Greene holds Bachelor's and Master's degrees in Psychology and a Doctorate in Counseling Psychology from Virginia Commonwealth University. Certified by the American Board of Professional Psychology and licensed as a clinical psychologist in Virginia and Florida, he has held licenses in Professional Counseling and/or Psychology since 1980. Prior to his current position as Chief of Operational Psychology for the Air Force Special Operations Command, Dr. Greene has served as Chief of Psychological Services for the Air Force in Korea; as Chief of Behavioral Health Services for the 16th Special Operations Wing (SOW), and as Chief of Aerospace and Special Operations Psychology for the 16th SOW. His military education includes the USAF Aircraft Mishap Prevention and Investigation Course; the US Army Aero-Medical Psychology Course; Air Command And Staff College; Air War College; DOD High Risk Survival Training; and US Navy Hostage Survival Training. COL Green has served in Air Force Special Operations since 1993, and has managed numerous programs and issues in the selection, training and support of elite forces involved in highly sensitive missions worldwide.
